Introduction to Scrum Master Profession

Working as a Scrum Master

Scrum Master Capstone

Practice Exam for Certified Scrum Master (CSM) Certification

Aug 20, 2024

Purvakkumar Patel

has successfully completed the online, non-credit Specialization

Scrum Master

After completing this Specialization, learners will be able to showcase their proficiency in Scrum Master concepts, tools, principles, mindsets, and terminology. They will possess knowledge to initiate an Agile project, carry it out effectively, and navigate risks throughout its lifecycle. Learners will be able to manage stakeholders and communicate with them adeptly while also applying leadership skills. Those who complete this Specialization will have completed numerous hands-on labs and projects to gain practical experience. Learners also build a portfolio of projects demonstrating their aptitude for an entry-level role as a Scrum Master. Additionally, the final course in the Specialization is intended to help prepare learners for the CSM certification exam from the Scrum Alliance.
